GT780DX info kit

Edited by: Koen Coppens

Version: 1.3

What gamers say…

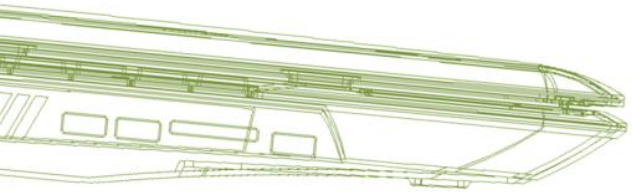
*"**Having the most powerful gear is a must when it comes to competitive gaming.** You need a system that can run the highest frame rates, and a design and layout that suits gamers´ needs. The gaming laptop is something we use in our homes when practicing, but also on the road when we participate in tournaments, therefore it's extremely important that our laptops have the best quality out there."*

Patrik '***cArn***' Sattermon,
Counterstrike Team leader *Fnatic.MSI*

MSI, Brand for Gamers.

Designed for gamers

The design concept is based around **less curves with crisp lines**. **Brushed aluminum finish** for strength and style, but also a more robust chassis from a technical point of view.
Full black was a must with a **backlight logo** to reinforce gamer identity.



Keyboard by SteelSeries

Keyboard by steelseries

- First priority — The most used gaming keys (W, A, S, D, Ctrl and Space
- 2nd priority — The second priority gaming keys
- 3rd priority — The third priority gaming keys

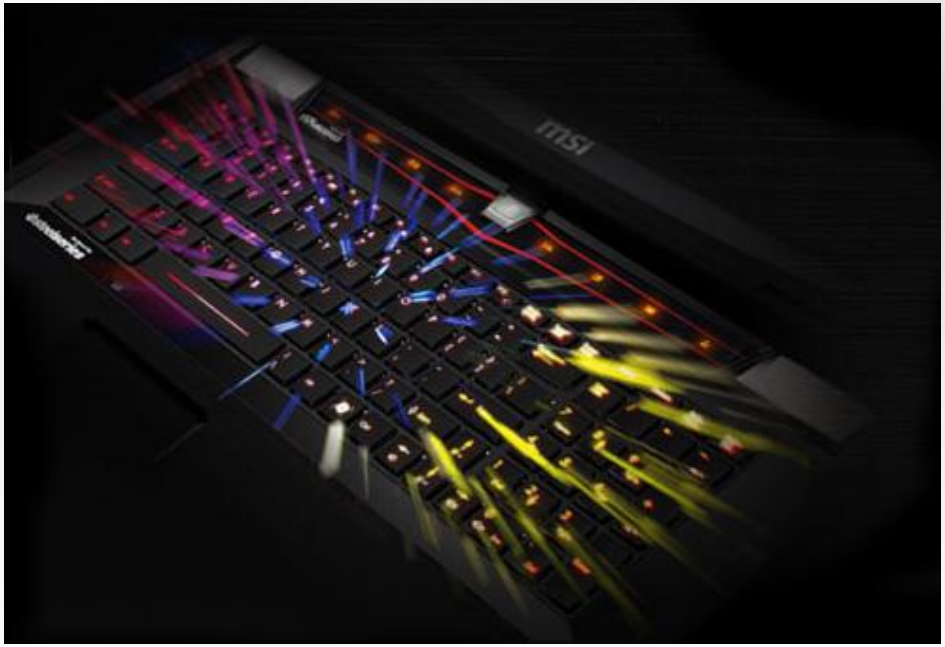
- 3rd priority — The third priority gaming keys

Multi-color backlight design

Keyboard by steelseries



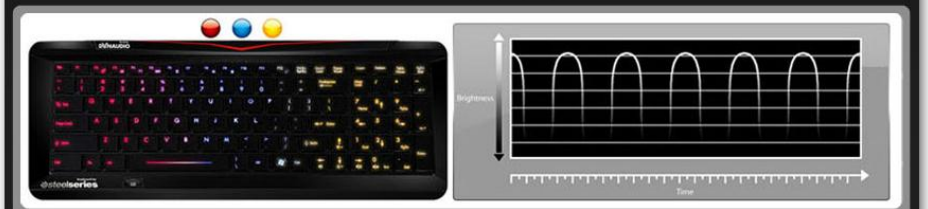
Full Color Programmable Backlight

Choose from more than 1,000 display combinations and 5 programmable scenario modes with the Keyboard LED Manager (KLM).

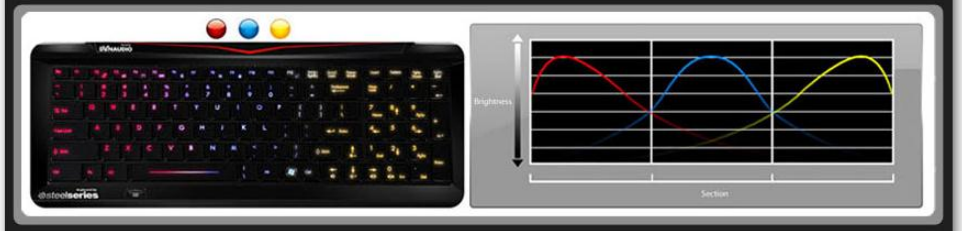
1. NORMAL MODE:
Colors chosen by the user can be applied to the whole keyboard; different colors can be set for the three different sections.

2. GAMING MODE:
Only the LEDs on the left remain enabled. A choice of 29 colors is available.

3. BREATHING MODE:
The alternating bright and dim appearance of the selected color creates a pulsating breathing effect.



4. WAVE MODE:
This creates an effect reminiscent of "the wave" by fans in a stadium. The LEDs alternate between the selected color and darkness in a gradation which flows from right to left.



5. DUAL COLOR MODE:
The whole keyboard LEDs alternate between two selected colors in a gradient mode.

Gamers' opinion – SteelSeries keyboard

Questions to
Patrik "***cArn***" Sattermon,
Counterstrike Team leader *Fnatic.MSI*

MSI : What do you think about GT780DX SteelSeries keyboard?

"As a gaming laptop has limited space to fit in a keyboard, I think simplicity is the only way to go. The MSI GT780DX keyboard has ***highlighted and enlarged the buttons that the majority of gamers use.*** *The* ***function and windows button is conveniently relocated*** *and smaller than the standard laptop keyboards."*

MSI : Why is it important to have a good keyboard layout?

"In some of the games a player can have up to 400 actions per minutes, this means a keyboard has to be very distinct so the player can ***easily find the desired key*** *he/she want to press. Also, the majority of gamers have a background using desktop PC with the full-sized keyboard, therefore it's important that the gaming laptop keyboard's design reminds you of a full-size keyboard."*

Gamers' opinion – Non-glare panel

- **The screen is the eyes of the gamer**

MSI therefore has chosen the highest quality of panel available for GT780DX.

- **Non-Glare filter**

You can play in any condition inside or outside without being distracted by reflections

- **LED backlight**

For superior image quality, and longer battery life

- **Full HD**

Accurately displays the detail of latest games, with no loss of quality when watching Blu-ray movies

Why is it important to have a non-glare panel during competition?

*"Besides the powerful system you also need a screen that **displays the in-game images as clearly and as fast as possible**. If your screen is not very visible you will lose time to react during battle, and even the smallest delay can cause big setbacks."*

Blu-Ray combo drive

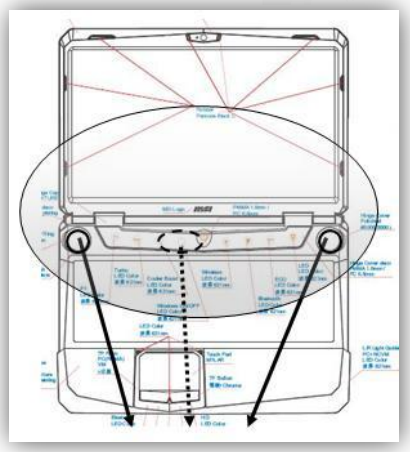
Comparison between DVD and Blu-Ray

Sound by Dynaudio & THX

Sound by DYNAUDIO



- Dynaudio designes customized speakers, inspired by their high end audio range. The whole electronics circuit have been redesigned to offer **more realistic sound with high fidelity**. Every detail created by the game designers will be **played back with impressive precision**.

THX TruStudio PRO

- With THX TruStudio PRO, movies and games can be experienced in a **real-life surround sound experience**.

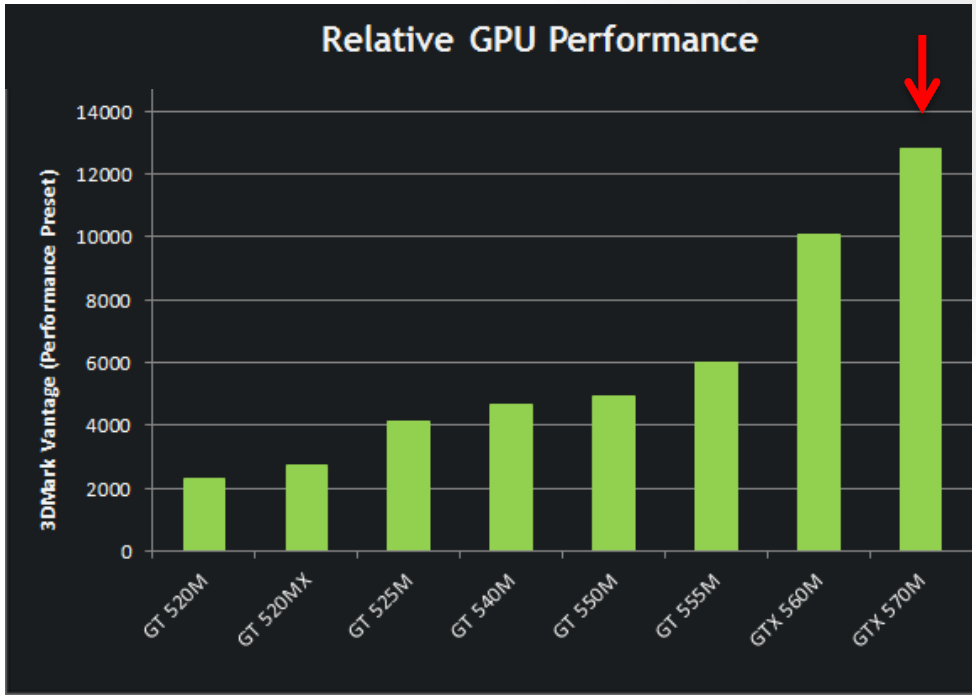
-Trying the MSI G-series notebook range with Dynaudio & THX sound is an experience you will never forget!-

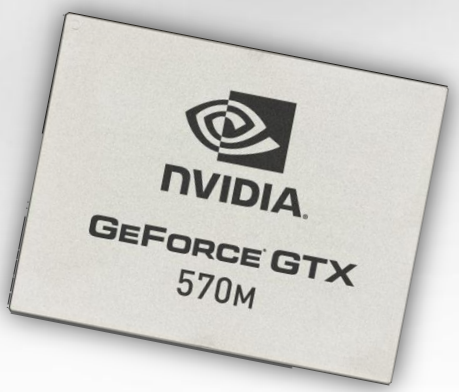
Why is it important to have a very good sound when playing games?

*"In FPS-games the sound is used to **detect your enemies**, along with your vision on your screen plus the in-game communication tool you and your teammates are using. Besides having great in-game sound I also find it important to have powerful speakers that you can **use for multimedia, such as movies and music**."*

NVIDIA® GeForce® GTX 570M

"The NVIDIA® GeForce® GTX 570M, ***up to 34% faster than the previous generation****, lets you play the latest games at HD resolutions"*





Supported Technologies

- 3D Vision
- CUDA
- DirectX 11
- PhysX
- SLI

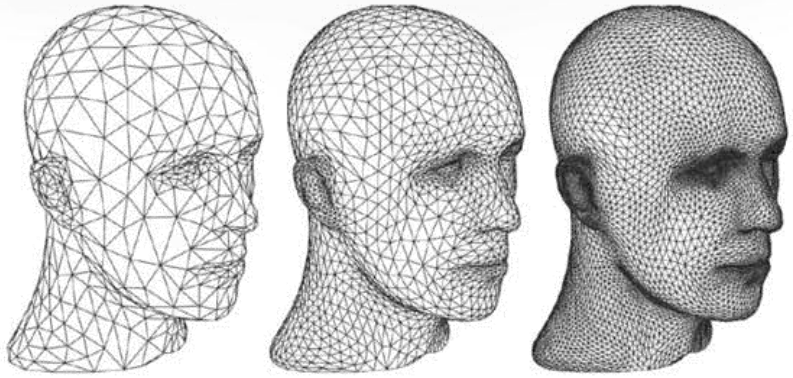
NVIDIA® GeForce® GTX 570M

*"Get amazing visual quality, **improved efficiency and dramatic gaming** performance for today and tomorrow with support for Microsoft® DirectX® 11"*

[NVIDIA - Tessellation: Hair Demo]

DX11: Tessellation

- Characters with **beautiful curves**
- **Super detailing** of surfaces such as thorns, nails and skin.
- **Fast rendering** of geometric areas with large amounts of information.
- **Seamless transitions** between surfaces



Microsoft® DirectX11

NVIDIA® GeForce® GTX 570M

*"NVIDIA® PhysX® technology adds an **element of realism** never before seen in gaming."*

NVIDIA® PhysX®

With an NVIDIA® GeForce® GPU in your PC, experience dynamic PhysX® effects:

- Blood Spatter
- Interactive smoke
- Splashing debris
- Wavy effect of clothing
- Etc ...

The MSI GT780DX: optimal gaming experience in this years blockbuster games!

Turbo Drive Engine technology

Extra performance boost with one push on the Turbo button!

Storage performance

-Please check your local SKU!-

SKU with two HDD - GT780DXR

- **RAID 0:** MSI uses RAID 0 on high performance NB's like GT780DX to boost up the HDD writing & reading speed up-to 2 times.

Dual HDD

SKU with SSD - GT780DX

- **SSD on GT780DX** gives an enormous performance boost and is more Silent, Faster, Smaller, Lighter, and uses less Power.

- **Combined with HDD** for massive storage for all your movies, music and games.

Other features

Easy memory upgrade

- Four SO-DIMM slots with **up to 16 GB** storage capacity
- Easy upgrade to accelerate the notebook processing speed

Fast USB3.0 file transfers

USB 3.0

10X faster copying an 25GB HD movie in 70 seconds

- 10X higher data transfer rates (4.8 Gbps) than USB 2.0

Compatible to the future high speed CE devices

Cooler Boost technology

- Cooler Boost cools the CPU and GPU faster to decrease the fan speed by giving real-time notification of the MSI notebook's core temperature variations and fan speed

Smooth social networking

HD Webcam

Legacy Webcam
8 frames per second face to face talk.

HD Webcam
1280x720 (720p) @ 30fps smooth video capture and face to face talk.

i-Charger technology

- MSI i-Charger allows you to use your laptop as a battery extender, charging your iPod / iPad / Android device when your laptop is powered down!
- Click the i-Charger software to Connect right USB device to charge. 3x faster charge speed than normal USB2.0.
