

Flash BIOS by UEFI BIOS Setup Utility

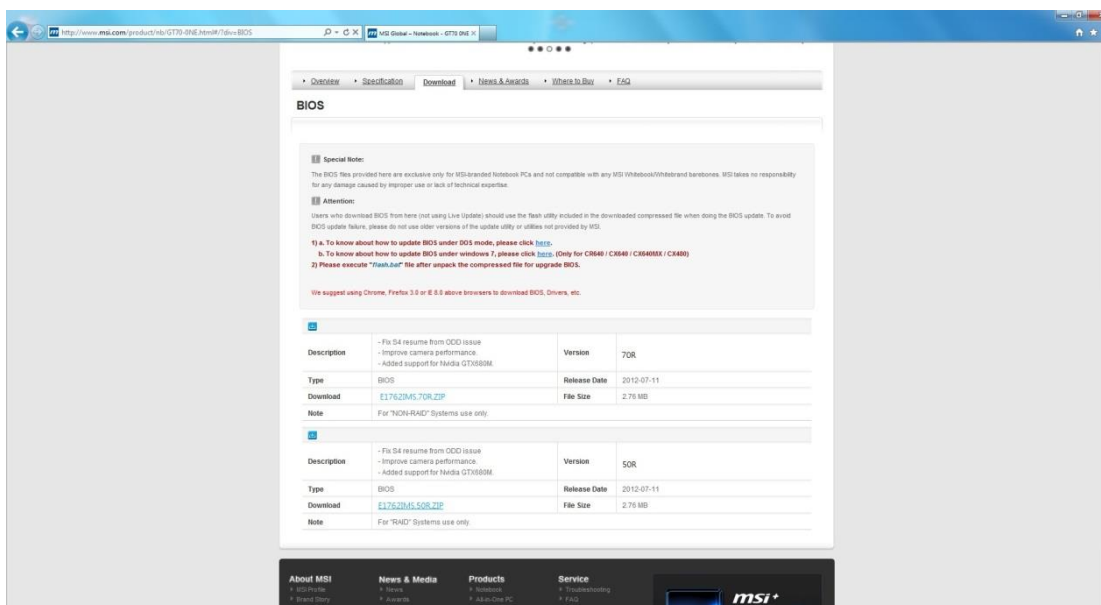

IMPORTANT!

Only update your BIOS if system is unstable or bug solutions correspond with your needs. Flashing BIOS incorrectly has risk to damage your system. Please check the guide and follow all of steps.

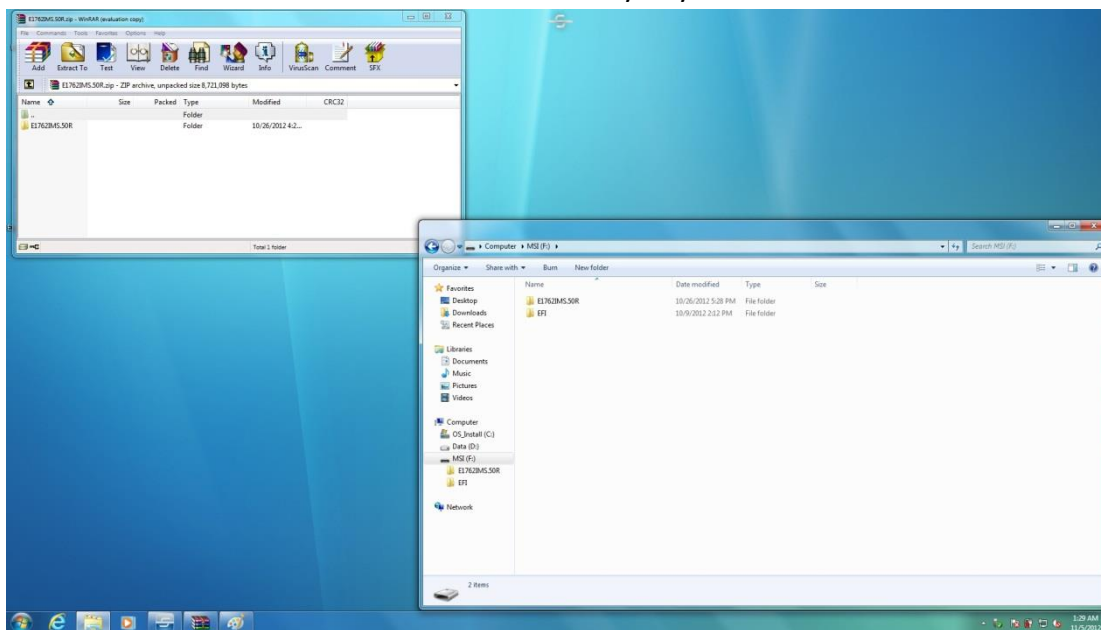

Things to prepare:

- USB Flash Drive
- Laptop/NB system
- NB default power supply
- Internet connection
-

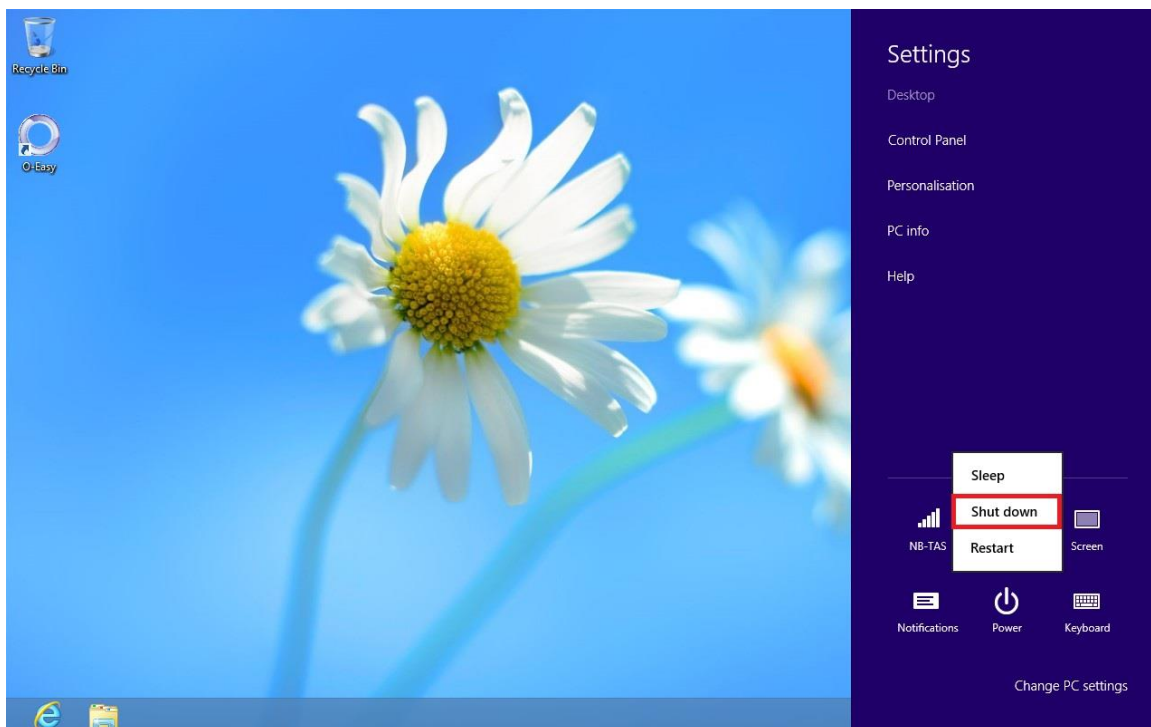

1. Visit MSI official website and download BIOS to our system.

2. Extract the downloaded file to the root directory of your USB drive.

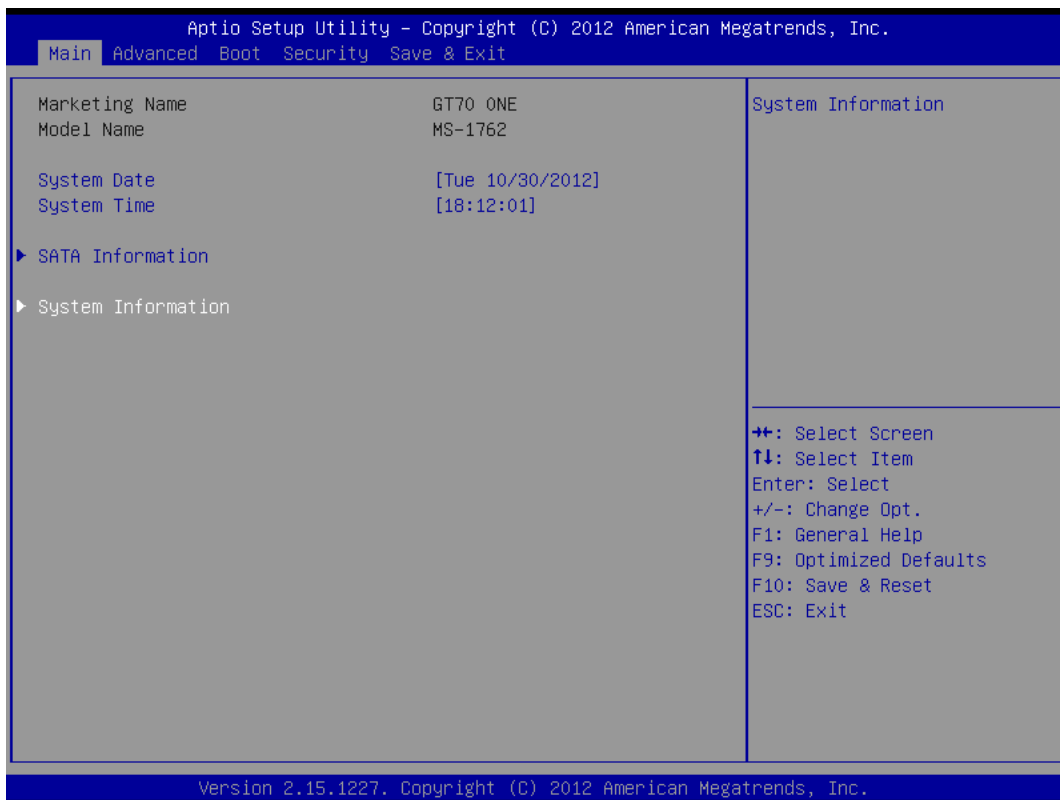

3. Please shut down system directly by pressing [Shift] key and click [shut down] option as below.

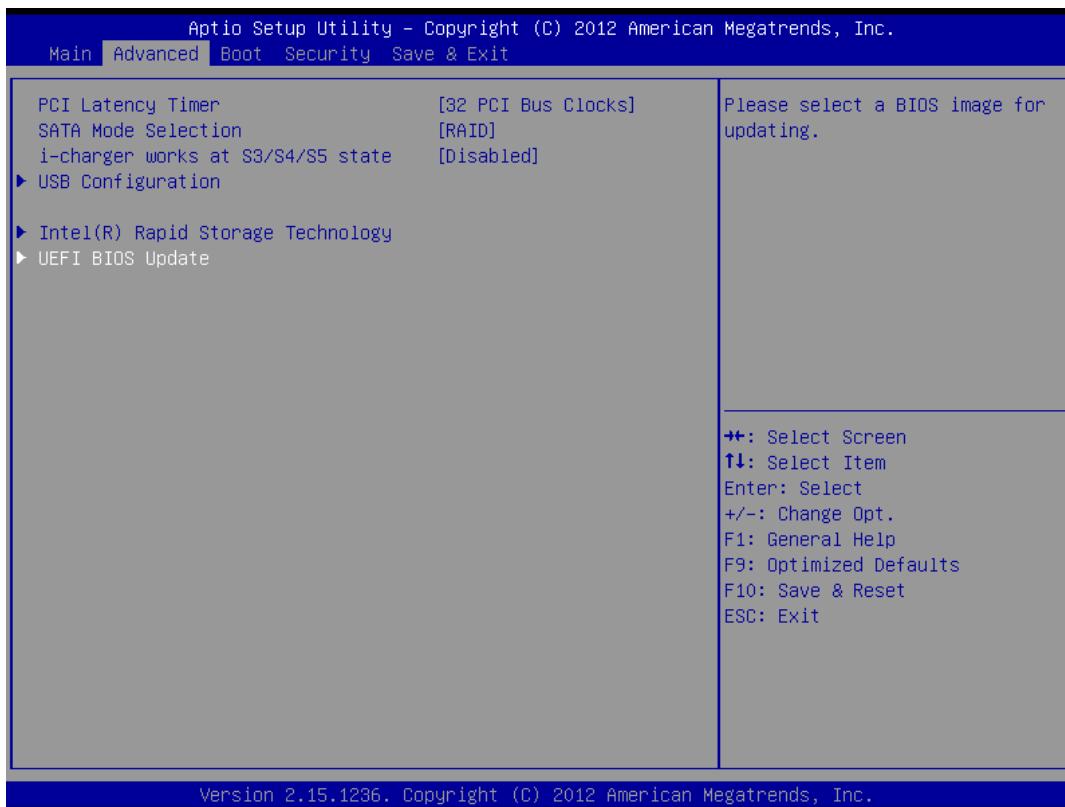

4. Power up your NB with AC adapter. Please make sure that NB is running with AC Power during entire update process.

5. Power on NB and press [DEL] button when MSI logo is displayed.

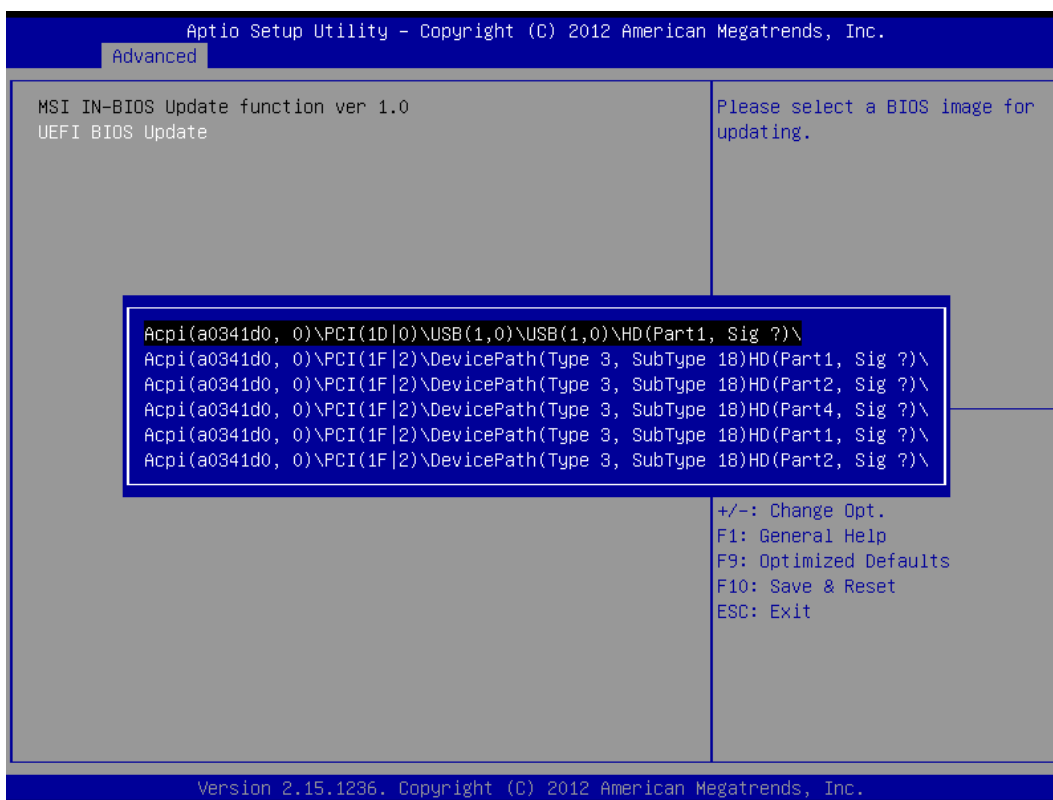

6. Please select [Advanced] and scroll down to [UEFI BIOS Update]. Then, press [Enter] key to continue.

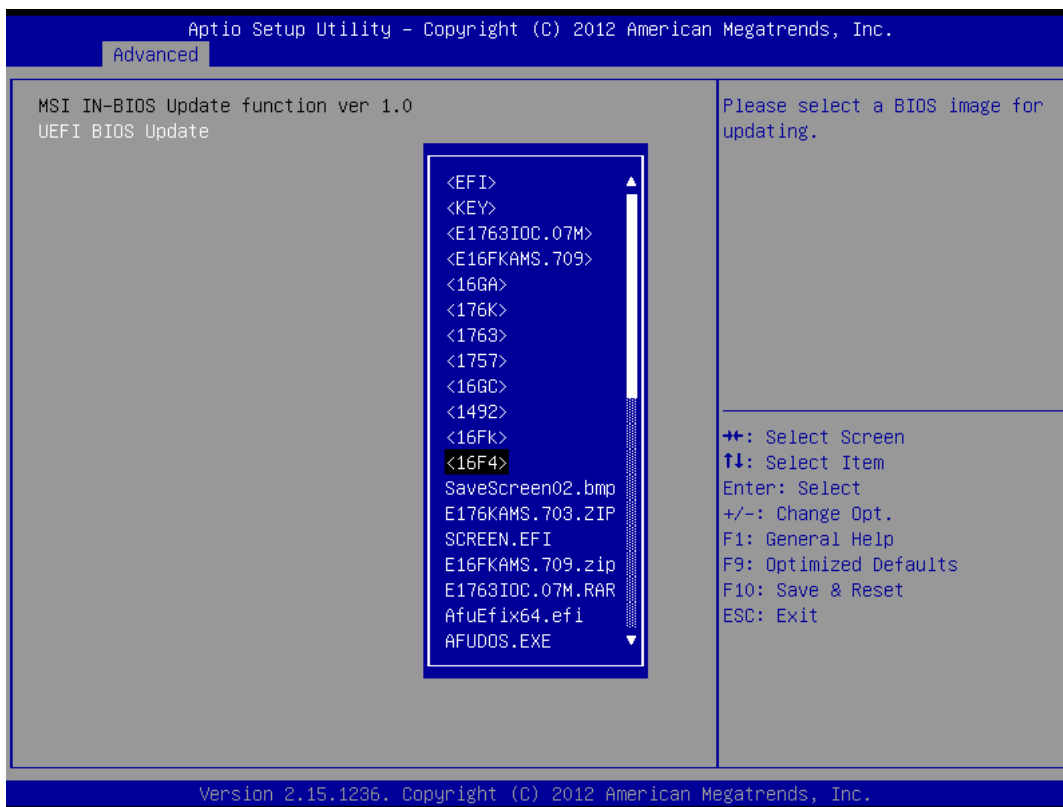

7. Press [Enter] key again to start the process.

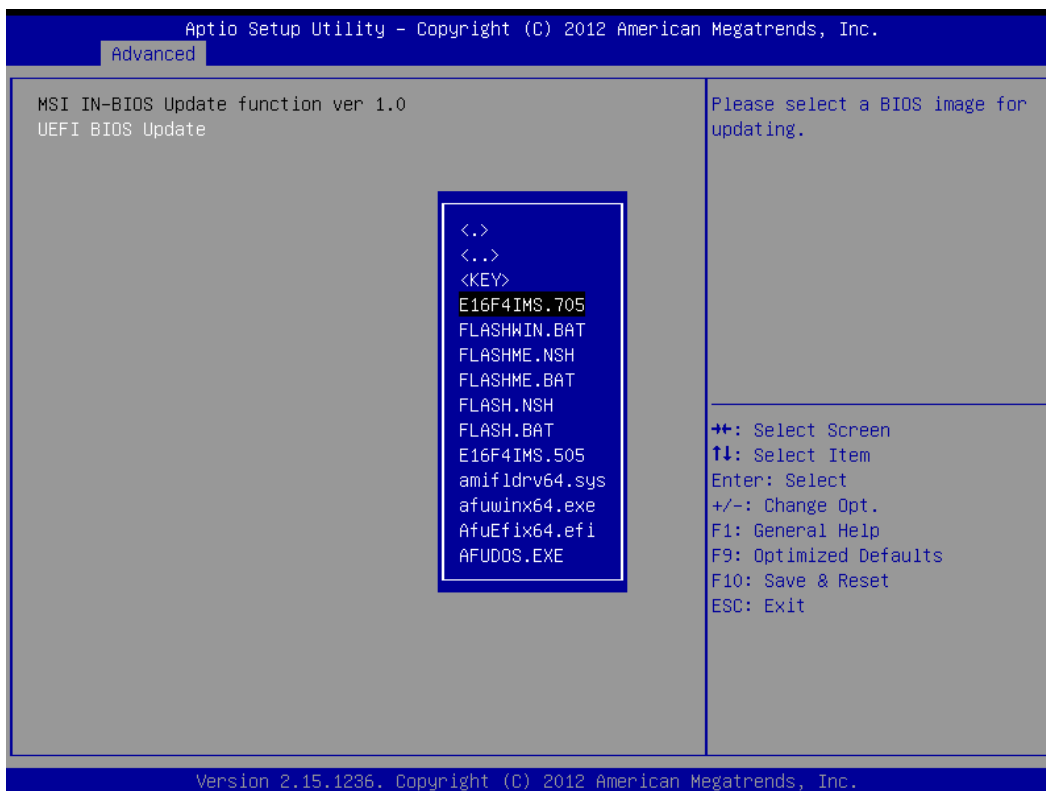

8. Please select the USB flash which includes the downloaded BIOS ROM.

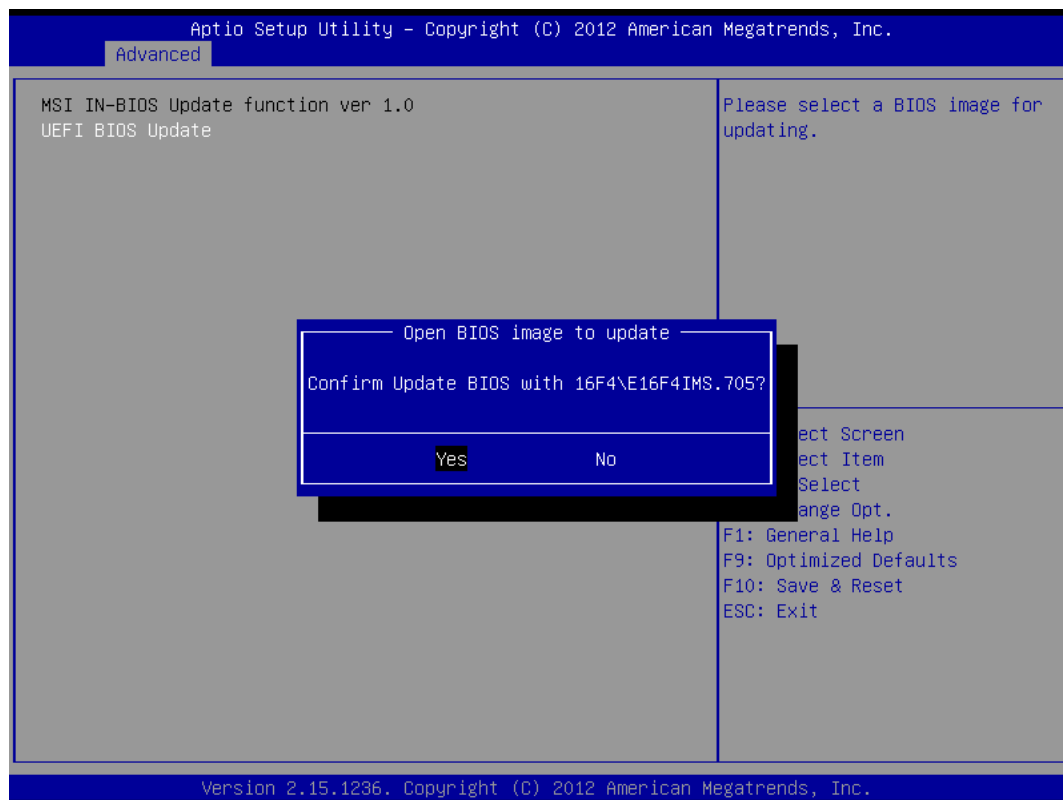

- Please select the folder which includes the downloaded BIOS ROM. If you put the BIOS ROM under the root directory of your USB flash. Please jump to next step directly.

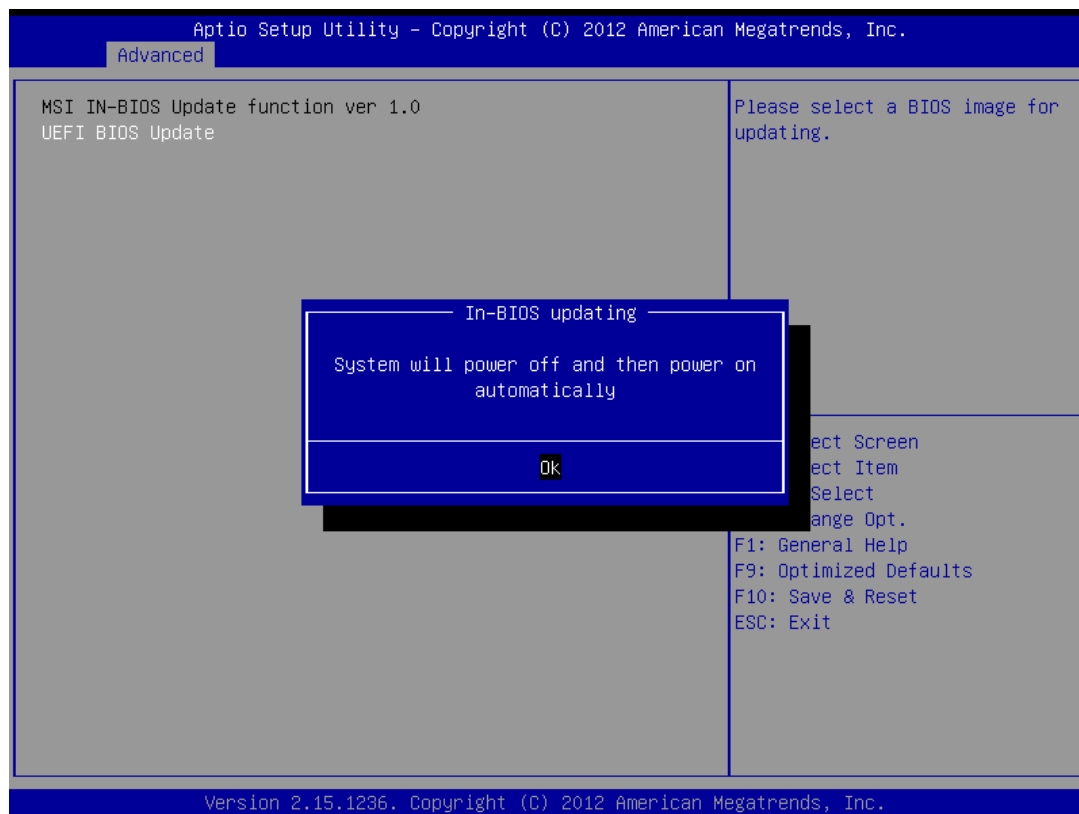

- Find the BIOS ROM and press [Enter] to continue.

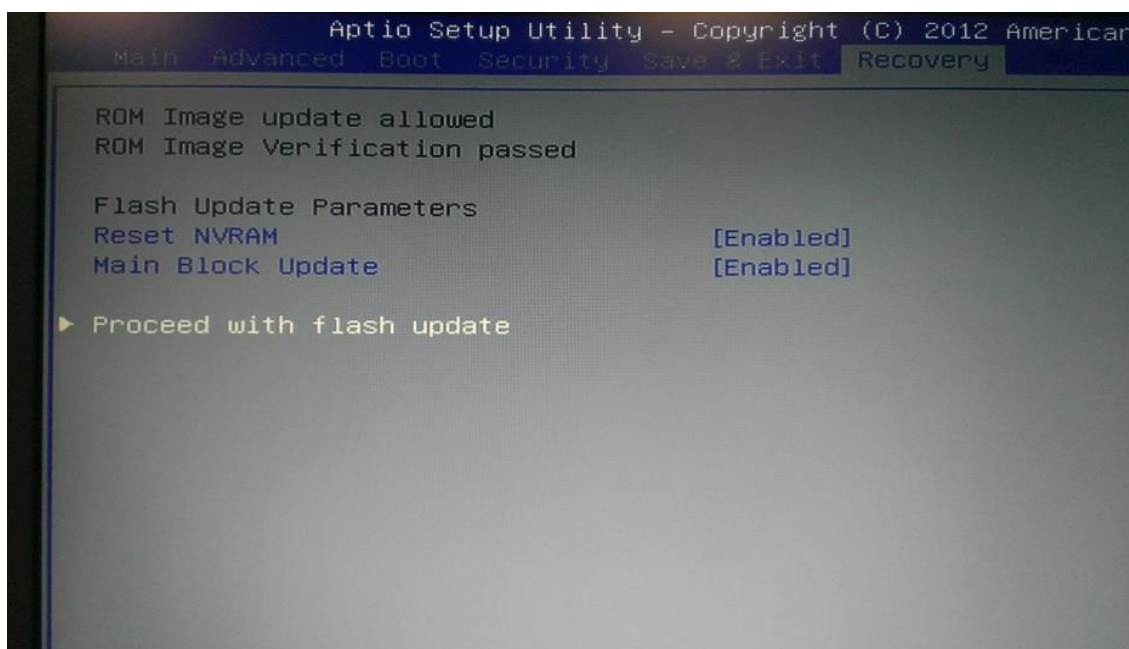

11. Select [Yes] to continue.

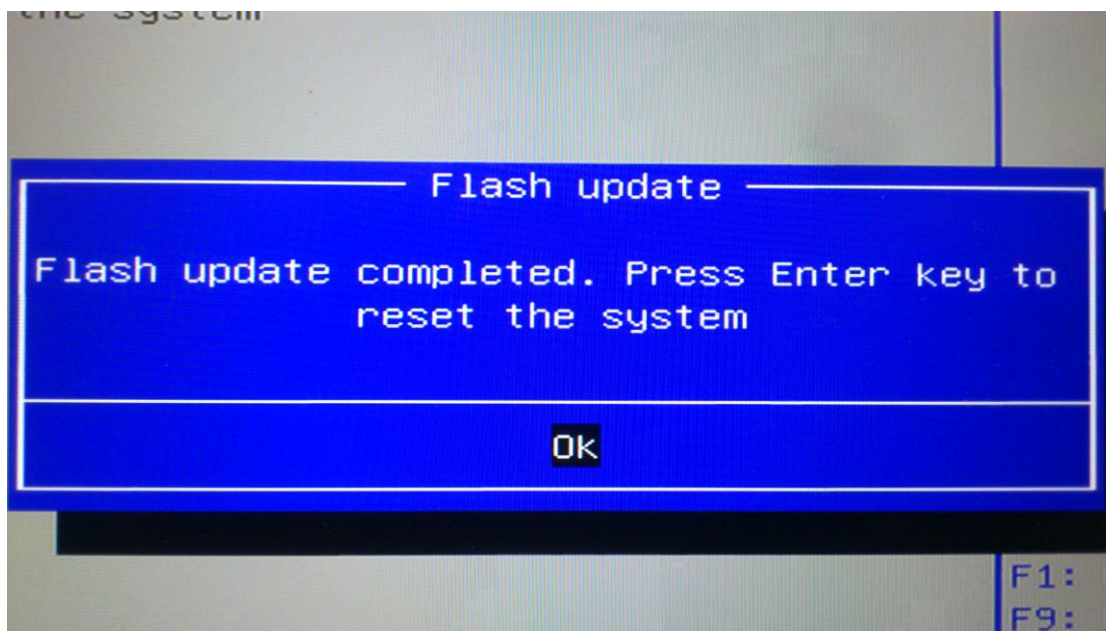

12. System will start rebooting when you press the [OK] button.

13. After reboot, system will access BIOS Utility. Please press [Enter] key to proceed with flash update.

14. When you see the message, please turn off the laptop and unplug AC adapter, and then wait for at least 7 seconds. Or just press [Enter] key when you see the message and system will reboot and log in Windows. After Windows is loaded, please shut down system and remove AC adapter, and then wait for at least 7 seconds.

15. Now the update is finished. Turn on system and have fun!
